

WHAT IS CLAIMED IS:

1. A travel information distribution system comprising:

a schedule table preparator for preparing a schedule table containing reference places for obtaining information in a traveling, arrival dates and times of the reference places and distribution data to
 5 be distributed to a wireless terminal of a user in the reference places from an itinerary table of a travel; and

a data distributor for searching the arrival dates and times in order from the schedule table prepared by the schedule table preparator to distribute distribution data to the wireless terminal of the user in
 10 respective arrival dates and times via a network.

2. The travel information distribution system claimed in claim 1, wherein the wireless terminal includes:

a distribution data identifying information storage for storing identifying information for identifying the distribution data distributed
 5 by the data distributor;

a specifier for specifying one of a presence and an absence of use of the distribution data related to the identifying information stored in the distribution data identifying information storage; and

a notifier for notifying the data distributor of the distribution
 10 data specified by the specifier after finishing of the travel.

3. The travel information distribution system claimed in claim 1, wherein the wireless terminal includes:

a place specifier for specifying the places where the user has used the distribution data distributed by the data distributor;

5 a place storage for storing the places specified by the place specifier; and

a notifier for notifying the data distributor of the places stored

in the place storage after finishing of the travel.

4. The travel information distribution system claimed in claim 1, wherein the wireless terminal includes:

a schedule table receiver for receiving a schedule table prepared by the schedule table preparator; and

5 a distribution data transmitting requester for requesting the data distributor to transmit distribution data at a distribution timing of respective distribution data on the basis of the schedule table received by the schedule table receiver.

5. The travel information distribution system claimed in claim 1, wherein the distribution data is distributed to the wireless terminal by an e-mail.

6. The travel information distribution system claimed in claim 1, wherein the distribution data is distributed to the wireless terminal by a file described by a descriptive language.

7. The travel information distribution system claimed in claim 1, wherein the distribution data includes addresses of contents on the network, and the wireless terminal accesses to the addresses to download necessary contents.

8. A travel information distribution system comprising:

a schedule table preparator for preparing a schedule table containing reference places for obtaining information in a traveling, arrival dates and times of the reference places and distribution data to
5 be distributed to a wireless terminal of a user in the reference places from an itinerary table of a travel;

a tolerance calculator for calculating time tolerances with respect to the arrival dates and times written in the schedule table prepared by the schedule table preparator;

10 an arrival date corrector for correcting the arrival dates and times to earliest ones on the basis of the tolerances calculated by the tolerance calculator; and

a data distributor for searching the arrival dates and times in order from the prepared schedule table to distribute distribution data
15 related to the arrival dates and times corrected by the arrival date corrector to the wireless terminal of the user in respective arrival dates and times via a network.

9. The travel information distribution system of claimed in claim 8, wherein the wireless terminal includes:

a distribution data identifying information storage for storing identifying information for identifying the distribution data distributed
5 by the data distributor;

a specifier for specifying one of a presence and an absence of use of the distribution data related to the identifying information stored in the distribution data identifying information storage; and

a notifier for notifying the data distributor of the distribution
10 data specified by the specifier after finishing of the travel.

10. The travel information distribution system claimed in claim 8, wherein the wireless terminal includes:

a place specifier for specifying the places where the user has used the distribution data distributed by the data distributor;

5 a place storage for storing the places specified by the place specifier; and

a notifier for notifying the data distributor of the places stored

in the place storage after finishing of the travel.

11. The travel information distribution system claimed in claim 8, wherein the wireless terminal includes:

a schedule table receiver for receiving a schedule table prepared by the schedule table preparator; and

5 a distribution data transmitting requester for requesting the data distributor to transmit distribution data at a distribution timing of respective distribution data on the basis of the schedule table received by the schedule table receiver.

12. The travel information distribution system claimed in claim 8, wherein the tolerance calculator calculates the tolerances by multiplying tolerances based on kinds of transport means for arriving at respective places by respective factors determined according to dates of moving.

13. The travel information distribution system claimed in claim 8, wherein the tolerance calculator calculates the tolerances by multiplying tolerances based on kinds of transport means for arriving at respective places by respective factors determined according to time bands of moving.

14. The travel information distribution system claimed in claim 8, wherein the tolerance calculator calculates the tolerances by multiplying tolerances based on kinds of transport means for arriving at respective places by respective factors determined according to dates and time bands of moving.

15. The travel information distribution system claimed in

claim 8, wherein the distribution data is distributed to the wireless terminal by an e-mail.

16. The travel information distribution system claimed in claim 8, wherein the distribution data is distributed to the wireless terminal by a file described by a descriptive language.

17. The travel information distribution system claimed in claim 8, wherein the distribution data includes addresses of contents on the network, and the wireless terminal accesses to the addresses to download necessary contents.

18. A travel information distribution system comprising:

a schedule table preparator for preparing a schedule table containing destinations as reference places for obtaining information in a traveling, position information of the destinations and distribution data to be distributed to a wireless terminal of a user in the reference places from an itinerary table of a travel;

a position information detector for detecting position information as a present place of the wireless terminal carried in the travel;

a destination position information comparator for comparing the position information detected by the position information detector with position information of destinations shown in the schedule table prepared by the schedule table preparator; and

a data distributor for distributing distribution data related to the coincident destination to a wireless terminal via a network when the position information of any destination shown in the prepared schedule table is coincident with the position information detected by the position information detector by the comparison of the destination position

information comparator.

19. The travel information distribution system claimed in claim 18, wherein the wireless terminal includes:

a distribution data identifying information storage for storing identifying information for identifying the distribution data distributed
5 by the data distributor;

a specifier for specifying one of a presence and an absence of use of the distribution data related to the identifying information stored in the distribution data identifying information storage; and

a notifier for notifying the data distributor of the distribution
10 data specified by the specifier after finishing of the travel.

20. The travel information distribution system claimed in claim 18, wherein the wireless terminal includes:

a place specifier for specifying the places where the user has used the distribution data distributed by the data distributor;

a place storage for storing the places specified by the place
5 specifier; and

a notifier for notifying the data distributor of the places stored in the place storage after finishing of the travel.

21. The travel information distribution system claimed in claim 18, wherein the wireless terminal includes a position information transmitter for transmitting the position information to the data distributor at a certain time interval, and

5 the data distributor includes:

a personal schedule table containing times and places of the wireless terminal according to the travel schedule;

a tolerance calculator for calculating tolerances between the

position information transmitted from the position information
 10 transmitter and the schedule written in the personal schedule table on
 the basis of the time when the position information transmitter
 transmits the position information; and

a schedule table renewer for renewing the schedule table for
 the distribution of the distribution data by reflecting the calculation
 15 result of the tolerance calculator.

22. The travel information distribution system claimed in
 claim 18, wherein the wireless terminal includes:

a schedule table receiver for receiving a schedule table
 prepared by the schedule table preparator; and

5 a distribution data transmitting requester for requesting the
 data distributor to transmit distribution data at a distribution timing of
 respective distribution data on the basis of the schedule table received
 by the schedule table receiver.

23. The travel information distribution system claimed in
 claim 18, wherein the wireless terminal includes:

a schedule table receiver for receiving a schedule table
 containing a schedule for a distribution of distribution data;

5 a schedule table storage for storing the schedule table
 received by the schedule table receiver;

a comparator for comparing distribution data, a distribution
 time and a distribution place when the distribution data is distributed
 with a distribution data, a distribution time and a distribution place
 10 written in the schedule table stored in the schedule table storage; and

a tolerance data transmitter for transmitting tolerances of the
 distribution time and place of the schedule table as the comparison
 result of the comparator as tolerance data, and

the data distributor includes a schedule table renewer for renewing the
 15 contents of the schedule table by reflecting the tolerance data
 transmitted from the tolerance data transmitter.

24. The travel information distribution system claimed in
 claim 18, wherein the distribution data is distributed to the wireless
 terminal by an e-mail.

25. The travel information distribution system claimed in
 claim 18, wherein the distribution data is distributed to the wireless
 terminal by a file described by a descriptive language.

26. The travel information distribution system claimed in
 claim 18, wherein the distribution data includes addresses of contents
 on the network, and the wireless terminal accesses to the addresses to
 download necessary contents.

27. A travel information distribution system comprising:
 a schedule table preparator for preparing a schedule table
 containing destinations as reference places for obtaining information in
 a traveling, position information of the destinations and distribution
 5 data to be distributed to a wireless terminal of a user in the reference
 places from an itinerary table of a travel;

a position information detector for detecting position
 information as a present place of the wireless terminal carried in the
 travel;

10 a tolerance table containing tolerances between position
 information of reference positions of respective destinations and
 position information of border positions of respective destinations
 shown in the schedule table prepared by the schedule table preparator;

an area calculator for calculating areas of respective
 15 destinations from the position information of the reference positions of
 respective destinations and the tolerances shown in the tolerance table;

a destination position information comparator for comparing
 the areas calculated by the area calculator with the position information
 of the wireless terminal, detected by the position information detector;
 20 and

a data distributor for distributing distribution data related to
 the destination area including the position information of the wireless
 terminal to a wireless terminal via a network when the position
 information of the wireless terminal is included in any destination area
 25 by the comparison of the destination position information comparator.

28. The travel information distribution system claimed in
 claim 27, wherein the wireless terminal includes:

a distribution data identifying information storage for storing
 identifying information for identifying the distribution data distributed
 5 by the data distributor;

a specifier for specifying one of a presence and an absence of
 use of the distribution data related to the identifying information stored
 in the distribution data identifying information storage; and

a notifier for notifying the data distributor of the distribution
 10 data specified by the specifier after finishing of the travel.

29. The travel information distribution system claimed in
 claim 27, wherein the wireless terminal includes:

a place specifier for specifying the places where the user has
 used the distribution data distributed by the data distributor;

5 a place storage for storing the places specified by the place
 specifier; and

a notifier for notifying the data distributor of the places stored in the place storage after finishing of the travel.

30. The travel information distribution system claimed in claim 27, wherein the wireless terminal includes a position information transmitter for transmitting the position information to the data distributor at a certain time interval, and

5 the data distributor includes:

a personal schedule table containing times and places of the wireless terminal according to the travel schedule;

10 a tolerance calculator for calculating tolerances between the position information transmitted from the position information transmitter and the schedule written in the personal schedule table on the basis of the time when the position information transmitter transmits the position information; and

15 a schedule table renewer for renewing the schedule table for the distribution of the distribution data by reflecting the calculation result of the tolerance calculator.

31. The travel information distribution system claimed in claim 27, wherein the wireless terminal includes:

a schedule table receiver for receiving a schedule table prepared by the schedule table preparator; and

5 a distribution data transmitting requester for requesting the data distributor to transmit distribution data at a distribution timing of respective distribution data on the basis of the schedule table received by the schedule table receiver.

32. The travel information distribution system claimed in claim 27, wherein the distribution data is distributed to the wireless

terminal by an e-mail.

33. The travel information distribution system claimed in claim 27, wherein the distribution data is distributed to the wireless terminal by a file described by a descriptive language.

34 The travel information distribution system claimed in claim 27, wherein the distribution data includes addresses of contents on the network, and the wireless terminal accesses to the addresses to download necessary contents.
